

E-MOBILITY/EV

MES delivers premium manufactured parts, including castings, forgings, machinings, assemblies, and stampings to the electrical vehicle industry. Our performance without compromise is reflected in every casting component produced. It starts with carefully selecting the global suppliers who have proven – repeatedly – that they can deliver cost-effective, timely, quality parts.

- ▶ Deliver quick product, and tooling lead times
- ▶ Competitive pricing for all manufactured parts, and tooling
- ▶ Provide high-quality castings, forgings, machinings, and more to many Tier I manufacturing customers
- ▶ Deliver best-in-class global supply chain solutions, domestic warehousing, engineering solutions, inventory management, quality management, and more
- ▶ Provide industry leading processes that deliver proven cost-effective solutions
