

TRANSPORTATION

MES delivers premium manufactured parts, including castings, forgings, machinings, assemblies, and stampings. These parts include under the hood components such as oil pumps, water pump housings, manifolds, connectors, transmission components and variety of brackets. Our growing list of global suppliers gives us the advantage of being able to provide optimum balance of cost, quality, delivery and lead times.

- ▶ Quick product & tooling lead times
- ▶ Provide high-quality castings, forgings, machinings, stampings and more to many major automotive OEM & Tier I/II customers
- ▶ Prime in building many common automotive parts including housings, manifolds, connectors, transmission components, brackets & more
- ▶ Deliver best-in-class global supply chain solutions, domestic warehousing, engineering solutions, inventory management, quality management & more
